## REFLECTIVE PAVEMENT MARKERS

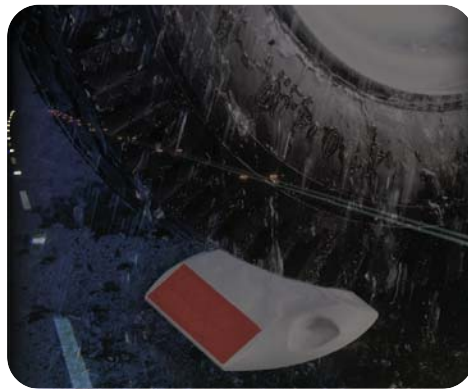

Without Pressure Sensitive Adhesive		
White	1-Way	#12401650
White	2-Way	#12401655
Yellow	2-Way	#12401660
Blue	2-Way	#12401670
Yellow/Red	2-Way	#12401675
Green	2-Way	#12401680
With Pressure Sensitive Adhesive (PSA)		
White	1-Way	#12401700
White	2-Way	#12401705
Yellow	2-Way	#12401710
Blue	2-Way	#12401720
Yellow/Red	2-Way	#12401725
Green	2-Way	#12401730

## 3M™ RAISED PAVEMENT MARKERS

3M™ Raised Pavement Markers Series 290 are designed for application on asphalt and Portland cement concrete road surfaces. The markers are designed to provide highly effective, long-term nighttime visibility in non-snow plow regions. The marker bodies are produced of an engineered thermoplastic that gives maximum impact resistance and weather ability. The retro-reflective element that provides wet and dry reflectance and long-term nighttime

- Highly retro-reflective micro-prismatic lens
- Abrasion resistant coating
- Impact resistant
- Long-term nighttime visibility
- Finger-grip design
- Available with pressure sensitive adhesive (PSA)

## RAISED PAVEMENT MARKERS

Pavement markers are designed to accomplish 3 main functions. Their first function is to eliminate the requirement of painting lane stripes. Secondly, raised pavement markers act as a "wake up call" for the driver that wanders out of their lane of travel by making a thumping sound. The third and most important function helps especially during night time driving. Reflective eliminates any or all reflectivity of paint with glass beads. Raised pavement markers stand above the pooled water and provide delineation of the travel lane.

### COLORS

Standard reflective markers measure 4"x 4" and can be purchased in several different colors including; white, amber, red, and blue. Combinations of colors can be used to delineate various road conditions or warning areas.

## 5" BUNDY ADHESIVE PADS

Torch down adhesive is used for raised pavement marker adhesive.

- Exceptional bond
- No temperature restrictions
- Preformed shape – no waste - no mixing
- Easy application

Compatible surfaces:  
Asphalt, concrete and brick.

Black	#13709503
Blue	#13709500
White	#13709501
Yellow	#13709502

## BUTYL PAD

Pressure sensitive, self-adhesive pad capable of securing markers to asphalt or concrete.

4" x 4"	#12000002
8" x 8"	#12000001

White	1-Way	#12400100
Yellow	1-Way	#12400200
Red	1-Way	#12400201
Red/Clear	2-Way	#12400400
Green	2-Way	#12400605
White	2-Way	#12400800
Yellow	2-Way	#12400300
Red	2-Way	#12400202
Red/Yellow	2-Way	#12400500
Blue	2-Way	#12400600
