## TEMPORARY MARKERS

### TEMPORARY OVERLAY MARKERS (TOM)

After the completion on a new paving job, TOMs, provide delineation on the road until lines can be painted on the new surface. Depending on weather conditions, TOMs are often required to last several weeks until paint can be applied. During this time it is extremely important that the TOMs last. We have seen individuals use "cheaper" temporary overlay markers that simply did not perform. In those cases the contractor had to go back and pay for his crew to re-apply the overlay markers. TOMs will work right for you the first time because they are designed with the highest quality and workmanship.

TOMs are manufactured and stocked in two standard colors, white and yellow, and can be made reflective on one or both sides. All TOMs feature a high tack butyl adhesive pad that provides for "peel and stick" quick installation to the roadway.

Size: 4" x 1.125" x 2"

- Type Y2 - Yellow 2 Way #12300401
- Type W1 - White 1 Way #12300300
- Type W2 - White 2 Way #12300301

### CHIP SEAL MARKERS (TRPM)

TRPMs are the most effective and convenient product on the market that provides short-term temporary road markings both day and night. TRPMs hold the original lane line location in chip, slurry or fog seal road maintenance operations. TRPMs are manufactured with one or two clear covers. These covers are designed to be removed after the sealing process to restore reflectivity to the marker. Other products exist that claim to be easy to use and provide good delineation, but only TRPMs are durable enough for use on both low volume and interstate highways.

TRPMs are manufactured with virgin engineering resins and the best reflective tapes and adhesives. They are built tough to stand up to the demands of maintenance work zones.

TRPMs are manufactured and stocked in two standard colors, white and yellow, and can be made with one or two clear, protective covers. All TRPMs feature a factory-applied high tack butyl adhesive pad that provides for a "peel and stick" quick installation to the roadway.

Size: 4" x 1.125" x 2"

High Heat Markers also available.

- Type Y1 - Yellow 1 Way #12300200
- Type Y2 - Yellow 2 Way #12300201
- Type Y2 - Yellow 2 Way #12300202 Double Cover
- Type W1 - White 1 Way #12300100
- Type W2 - White 2 Way #12300101
- Type W1 - White 1 Way #12300102 Double Cover

## TEMPORARY PAVEMENT TAPE

### REMOVABLE PAVEMENT TAPE

Removable pavement marking tape provides a bright, well delineated channel to guide motorists safely through construction zones and work crew areas. It is exceptionally quick and easy to install, highly durable and removes cleanly.

#### Product Benefits:

- Significant cost savings through dependable performance.
- Engineered for superior daytime visibility and nighttime reflectivity.
- Stands up to the heaviest traffic and inclement weather conditions.
- Design based upon 25 years of applied research and extensive field testing.

#### Application Benefits:

- Comes up cleanly- completely intact or in large pieces without damage to road surfaces.
- Unique adhesive allows tape to be placed down easily and stay down.
- Rapid installation reduces need for road closures.

- White 4" x 360' #12200500
- Yellow 4" x 360' #12200505
- Primer 1 Gallon #12201200

### REMOVABLE BLACK-OUT TAPE

Easy to install, highly durable, and completely removable means of providing a temporary cover for permanent roadway delineation. Black-out tape is available in a variety of widths and is intended primarily for construction zones when permanent markings are masked out temporarily but will be used in the future.

- 6" x 330' #12200525
- 8" x 90' #12200530

### FLEX-O-LINE TEMPORARY REFLECTIVE PAVEMENT MARKING TAPE

Flex-O-Line temporary reflective pavement marking tape provides easy and simple temporary delineation for roadways. Metallic backed tape is coated with high index glass beads on one side for maximum visibility under most weather conditions while the other side is coated with clear adhesive which sticks instantly to road surface.

Construction Grade Flex-O-Line is designed specifically to provide an easy, low cost method of putting down temporary traffic lines without any special equipment.

- White #12200100
- Primer 1 Gallon #12200350
- Yellow #12200200
- Primer 5 Gallon #12200300

### 3M™ WET REFLECTIVE REMOVABLE TAPE

Removable high performance wet reflective pliant polymer pavement marking material intended for longitudinal line applications in highway construction work zones where removability is required.

Remains visible in rainy conditions.

The tape is designed to perform for the duration of a normal construction season.

Available in White or Yellow, 4", 6", 8" widths

- 4" x 120yd White #12201250
- 4" x 120yd Yellow #12201260

### 3M™ STAMARK™ REMOVABLE BLACK LINE MASK

3M™ Stamark™ Removable Black Line Mask is used to cover existing pavement markings for temporary traffic diversion during highway work zone construction.

Available in 6" and 8" widths

- 6" #12200510
- 8" #12200515
