## PIPE POST

Pipe posts are commonly used to mount signs. They can be installed into the ground with a V-Loc for breakaway applications, set directly into cement, or buried directly into soil. Standard pipe post is 2" Inner Diameter (ID), 2-3/8" Outer Diameter (OD).

### SPECIFICATIONS:

Standard sizes: 10'6" and 12' Galvanized pipe post.

Wall Thickness	Schedule	10'6" (weight)	Part Number	12' (weight)	Part Number
.065	sch 5	18#	#12600100	21#	#12600500
.095	-	26.5#	#12600200	31#	#12600600
.116	sch 10	29.5#	#12600300	34#	#12600700
.154	sch 40	39#	#12600400	44#	#12600800

## SAVER SLEEVE INSERTS

To extend existing pipe post or repair broken pipe posts. For use on .065 wall pipe or Schedule 40 pipes.

- 2-3/8" OD x .065 Wall (Silver)  
Each #16402200  
Case of 50 #16402300
- 2-3/8" OD schedule 40 (Black)  
Each #16402000  
Case of 50 #16402100

## PIPE POST HARDWARE

THDW-105 Single Bracket  
(fits 2-3/8" OD Pipe)  
#16500800

THDW-107 Double Bracket  
(fits 2-3/8" OD Pipe)  
#16501005

THDW-500-2 Extruded Aluminum Sign Mounting Brackets  
Two-piece bracket includes bolts, nuts, and washers (fits 2-3/8" OD Pipe)

Extruded aluminum brackets, secures one or two traffic signs to 2-3/8" pipe post. Includes 2 brackets, 2 hex bolt/nut sets, 2 hex head bolt/round cap nut sets  
#16501520

Aluminum Pipe Cap  
(fits 2-3/8" OD Pipe) #12601000  
Galvanized Pipe Cap  
(fits 2-3/8" OD Pipe) #12601050  
Galvanized Pipe Cap  
(fits 2-7/8" OD Pipe) #12601100

## IMPACT RECOVERY POSTS

The Impact Recovery Post provides an excellent alternative to mounting a sign on a rigid post. It is constructed of flexible polyethylene plastic with an anti twist reactive spring assembly that rebounds to its original upright position when impacted. Impact Recovery Sign Posts are ideal for parking lots, object markers, island markers, or any location where a sign may be impacted frequently by vehicles. Installation options include Super Bundy Pads which are heated (See page 144) or Anchor Bolts

### Available Sizes:

- 36" Impact Recovery Post with fixed base #13001
- 48" Impact Recovery Post with fixed base #13002
- 60" Impact Recovery Post with fixed base #13003
- 66" Impact Recovery Post with fixed base #13004
- 102" Bollard enhanced Sign Post\* #13007

This 102" post is constructed of white powder coated aluminum. It has a 4" outer yellow durable plastic bollard, which helps to prevent bumper damage to the post. Will accommodate plastic or aluminum signs up to 18"X24".

### For Installation:

- 8" x 8" Super Bundy Pad #13709505
- Anchor Bolt Kit (4 Anchors) #11300200
