Your Traffic Sign & Supplies Resource Since 1956

## STREET SIGN TOPPERS

Some communities prefer custom signs with special colors and images applied to custom shaped aluminum.

Please call us with your project details.

### REQUIREMENTS:

Traffic Safety Supply Company has provided many neighborhoods with these attractive sign toppers. We have a few requirements for processing your sign topper order.

1. Sign Toppers must be the same length as the street name sign that they will be attached to, so a count of the different lengths of signs in your neighborhood will be needed.
2. Graphics submitted should be in a vector format and must be presented before final quoted price can be made, so we may determine if any graphic clean up or alterations will need to be made prior to production.
3. Standard Highway Fonts shall be used for text of sign toppers. Any special request for fonts will need to be reviewed by the design department before production to determine if the font can be used. Some fonts will have to be stretched and/or manipulated to fit on different sized sign toppers. A shop drawing can be provided for customer review.
