BARRIERS AND BARRIER DELINEATORS

WATER FILLED BARRIER

The industry's most advanced portable plastic barrier is a tough, versatile, portable, energy-absorbing, water-ballasted polyethylene barrier. It is economical and effective for many uses. This self-locking barrier makes it easy to connect and allows for curved configurations while locked together. Barrier will curve up to 15 degrees at each connection while remaining locked together.

Features Include:

- Only 85 pounds empty - Solid 1600 pounds when ballasted with water.
- Patented interior design prevents bulging and keeps sides straight and trim
- Light weight and easy to handle.
- 6 feet long, 3.5 feet high and 2 feet wide at the base.
- Carry slots for easier handling, fork-lift slots at bottom.
- Top inset slots for signs, screens, and flashers.

#16101100

LINEAR DELINEATION SYSTEM (LDS) PANELS

Linear delineation system (LDS) panels are fabricated from 3M™ Diamond Grade™ Reflective Sheeting laminated onto thin gauge aluminum. LDS panels are formed to a unique shape and applied to concrete barriers providing retroreflection across a wide range of entrance and observation angles.

The linear delineation system's unique mounting techniques enable easy application and allow road crews to complete installation of over a 1000-foot section in about six hours.

Benefits

- Improved safety on high-risk roadway sections for all motorists
- Diamond Grade™ optics provide superior brightness and angularity
- Crimped "wave" design enables extreme angularity performance
- Permanent or temporary installations

Suggested Use

- Changes in roadway geometry
- Guardrails
- Work zones
- On and off ramps
- Concrete barriers

High performance VHB tape is pre-applied to the panels for fast, easy application. No special tools or adhesives are required.

4" LDS DIAMOND GRADE PANEL

WHITE	34"	#15002006
FLUORESCENT YELLOW	34"	#15002005
FLUORESCENT ORANGE	34"	#15002015
RED	34"	#15002007

6" LDS DIAMOND GRADE PANEL

WHITE	34"	#15002001
FLUORESCENT YELLOW	34"	#15002021
FLUORESCENT ORANGE	34"	#15002011

JERSEY BARRIER DELINEATOR

Excellent visibility, due to the unique 6-point prism design, gives motorists an extra margin of safety even in inclement weather.

Approx. size: 3" x 5-1/4" x 2-1/2"

Effective reflex area: Approximately 9.5 square inches

Model JD-1 (Mono-Directional)

White #15400100 Amber #15400300

Model JD-2 (Bi-Directional)

White #15400200 Amber #15400400

Solvent Cement #15400500

(will install approx. 35-40 reflectors)

PORTABLE CONCRETE BARRIER REFLECTORS (PCBM)

Over 12 square inches of reflective sheeting, it exceeds federal standards for brightness. The PCBM can be used for top or side mount placement.

1 Way Yellow #15000102

2 Way Yellow #15000103

1 Way White #15000100

2 Way White #15000101

Adhesive Tube #15005000 (will apply approx. 20 reflectors)
