Triangle

Triangle-shaped
Snow Poles
#12000450

Snow poles, posts, and stakes are a highly visible target from any angle of approach, showing operators where to plow safely. They have the ability to flex when covered with snow and return to their upright position without bowing. Add reflective sheeting for a more visible nighttime target. The standard color is orange, however you can custom order other colors to fit your project needs. Also, the standard length stocked is 8ft.

Other lengths are available to match your specifications.

Please contact us for more information. Custom colors and sizes are available.
