SURFACE MOUNTED DELINEATORS

8"x8" Torch Down Adhesive Kit
#13709505
Box of 40 Kits
#13709530
8"x8" Self Adhesive Butyl Pad
#12000001

THE CHANNELIZER

Surface-Mounted, Impact-Resilient Delineator. This surface mounted channelizer is specifically designed for temporary applications such as construction zones where multi-impact resistance and ease of replacement is of utmost importance. With the Channelizer, installation and replacement is simple and minimizes worker's exposure time in dangerous traffic. The Channelizer transfers the stress from impacts to the base, allowing the plastic polymer tube to sustain less damage. It meets or exceeds all state specifications for two-way, two-lane delineators. Available in a flat style that permits vertical sheeting or a round style for applications requiring 360 degree visibility.

Colors: White Yellow, Orange
#12000330

#12000200

Colors: White Yellow Orange
Length: 36"

SUPER DUCK

Island Markings, Channelization, Parking Lots, Medians

The Super Duck is a flexible, surface mounted delineator capable of withstanding numerous vehicle impacts due to the unique support rod design that transfers the stress from an impact into the flexible boot. The delineation devices allow for a variety of applications: construction hazards, concrete islands, medians, and parking.

DURA-POST®

For delineation of traffic islands, entryways or wherever special markers are needed. Durable, flexible, and able to withstand the abuse at intersections and heavy traffic areas.

Colors: White, Yellow, Orange, Blue

Length: 36"
#12002480

SAFE-HIT®

Used for marking construction zones, centerline medians and H.O.V. lanes.

- Bases feature either pin-lock or twist-lock systems.
- Bases are capable of being reused when installed with butyl.
- Can be easily installed on asphalt or concrete.
- Twist-lock feature allows for ease of replacement, reducing maintenance crew's exposure to traffic.

Colors: White, Yellow, Orange

Lengths: 18", 24", 28", 36", 42", 48"

#11613880

Lite Black Base

Standard black surface mount base with quick release pins for general purpose applications. Mounts with butyl pads, bitumen, epoxy or anchor bolts. #12000605

Heavy Duty Colored Base

Extra tough base for more demanding applications. Available in colors to match posts. Mounts with butyl pads, bitumen, epoxy or anchor bolts. #12000610

CLOVER-LEAF DESIGN CHANNELIZER POSTS

These Channelizer posts save lives by properly directing traffic and reducing the chance of accidents. These highly visible posts clearly delineate driving lanes with bright colors and reflective sheeting.

The clover-leaf design of the channelizer provides far better rebound than simple round tubes. The curving of the sides of the channelizer changes the moment of inertia and builds up tremendous potential energy, resulting in a quick and sharp rebound after impact.

- Conforms to MUTCD & NCHRP 350 standards with proven durability on the NTPEP and TTI test decks
 - No metal pins in bases to rust or seize – simple installation and replacement of damaged posts
- Colors available: Black, Red, Yellow, Orange, White, and Blue. 36" #12004050
