VERTICAL PANELS AND MARKERS

SERGEANT STRIPES

Sergeant Stripes are used in lieu of Type II object markers when more target value is required, or any area where traffic is directed around two sides of an object. Sergeant Stripes are ideal for marking island ends or in advance of impact attenuators in a highway gore area.

Available Sizes: 12" x 24" and 18" x 36"

#11301400

HAZARD MARKERS

Hazard Markers are ideal for marking obstructions within or adjacent to the roadway. Hazard Markers are perfect for low water crossings, as well as protecting guardrail and bridge approaches.

Hazard Markers are available in a single or double sided version.

Available Sizes: 8" and 12"

#11300700

CHEVRON PANELS

Chevron Panels may be used as an alternative or supplement to standard delineators and to the large arrow sign. The chevron sign is intended to be used to give notice of a sharp change of alignment in the direction of traffic.

Chevron Panels are available in a 5' version for soil and pavement installations, and are also available in a 36" version designed for installation on jersey barriers.

#11301500

WORK ZONE VERTICAL PANELS

Vertical Panels may be used to channelize traffic, divide opposing lanes of traffic, separate traffic lanes, for lane closures, or in place of barricades where space is limited. They are ideal for use in work zones where changes in road alignment or lane shifts can create motorist confusion. Panels are available in single or double sided configurations

Available Sizes: 8" x 24" and 12" x 24"

#11300639

OPPOSING LANE PANELS

12" x 18" flexible high intensity orange sheeting with black arrows.

Overall height of unit is 36"

#11301700

TYPE II OBJECT MARKERS

Type II Object Markers may be used on island approach noses to indicate the presence of a raised curb or other obstruction or anywhere that a Type II is appropriate.

12" X 6" Yellow Flexible High Intensity Reflective Sheeting, White Panel and Post. Overall height of unit is 36"

#11301600
