Your Traffic Sign & Supplies Resource Since 1956

TRAFFIC CONES

STANDARD TRAFFIC CONES

Cones are manufactured with fluorescent pigments compounded with ultra violet materials assuring maximum color life. Also available in Blue, Lime Green, White, and Red.

- 5" #15100070
- 6" #15100080
- 12" #15100100
- 18" #15100200 w/6" Collar #15100201
- 28" #15100300 w/6" upper & 4" lower Collars #15100301

TRIMLINE CONES

Trimline cones are narrower than a standard conical cone. Since it is narrower, it requires less reflective sheeting, thus it is less expensive. Many agencies prefer the trimline due to its lower price and the fact that the narrower shape provides less "sail area" so the cone resists being moved by wind gusts.

- 28" #15100500
- w/ 6" upper & 4" lower Collars #15100501

ARROW TOP DELINEATOR

28" and 42", safety orange, easy grab handle and two, 3" white, high intensity reflective bands.

- 28" w/reflective bands and 12 lbs. base #52050
- 28" w/reflective bands and 18 lbs. base #52070
- 42" w/reflective bands and 12 lbs. base #52060
- 42" w/reflective bands and 18 lbs. base #52080

TEMPORARY TRAFFIC DELINEATORS

OPEN TOP DELINEATOR

Tube cones are two piece systems consisting of the upright "tube" and the "base" portion. Tubes come in 28" and 42" tall sizes. Bases are available in 12 lbs. and 18 lbs. Tube cones are typically used on construction jobs because they provide excellent channelization and resist movement from wind.

- 28" w/reflective bands and 12 lbs. Base #52001
- 28" w/reflective bands and 18 lbs. Base #52003
- 42" w/reflective bands and 12 lbs. Base #52002
- 42" w/reflective bands and 18 lbs. Base #52004

GRABBER TUBE DELINEATOR

The stem of the Grabber-Tube Cone is made of flexible yet durable fluorescent low density polyethylene material, with UV inhibitors to minimize fading. Convenient grabber handle design allows for easy movement and placement of Grabber-Tube. 100% recycled rubber bases.

- 28" w/reflective bands and 12 lbs. base #52020
- 28" w/reflective bands and 18 lbs. base #52025
- 42" w/reflective bands and 12 lbs. base #52030
- 42" w/reflective bands and 18 lbs. base #52035

NAVIGATOR DELINEATOR

Made of low-density, polyethylene, the Navigator meets M.U.T.C.D. standards.

Features:

- Break-away Design
- NCHRP-350 Compliant
- Saves space in truck or in storage
- Greater visibility than standard 18" cones
- Molded hole for mounting signal
- Handle can also serve as roping-off mount

- 42" w/16 lbs. base #51000

CHANNELIZER DRUM

The unique design of the Lifeguard® completely eliminates the need for sandbags as ballast, saving time and labor costs. The drum will separate on impact leaving the rubber base in place. Meets MUTCD standard 6F-5e.

Base is made from recycled truck tires. Drum is made with U.V. stabilized recycled polyethylene.

- Hi-Intensity Stripes #53008
- Tire Base Only #15300900
- Drum Only #15300801
