ROLL-UP SIGNS

Roll-up signs are commonly used during construction projects and other road work where temporary signs are required. A complete Roll-up system consists of a (1) fabric sign with sign bracing and (2) a sign stand. A common option on Roll-up signs is a Flag up system, which provides additional visibility.

Choose a sign size depending on your requirements and then select the type of roll-up material. Next select the appropriate stand to use with your sign. Give careful consideration to the conditions in which the signs will be used. If the signs will be deployed in a high wind area or around high traffic speeds, make sure the stand you choose is recommended for those conditions.

Material Specifications:

MARATHON™ material provides an extremely high level of retro-reflectivity. Marathon offers exceptional daytime brightness and enhanced nighttime visibility by providing a higher level of reflectivity of not less than 62,000 microprisms per square inch. In addition, Marathon is a super high performance material warranted for 3 years to retain its color and retro-reflectivity.

SUPER BRIGHT™ fluorescent orange material is a highly reflective, high performance material designed for a high level of retro-reflectivity. Super Bright™ offers outstanding daytime brightness and excellent nighttime visibility, providing a high level of reflectivity of not less than 47,000 microprisms per square inch.

FLOURESCENT CORAL Retro-reflective fluorescent coral-colored signs are federally recommended for emergency response and traffic incident management. Distinct color clearly distinguishes traffic emergencies from construction zones or other road hazards.

NON-REFLECTIVE VINYL fluorescent orange material Roll-Up signs are an economical way to alert drivers of events, parking, and safety check points, when the use of a reflective sign is not required. Intended for daytime use only. Not intended for use during low light conditions and night operations.

FLAG OPTIONS:

Flip-up System

This permanently attached folding flag system insures that flags will always be handy and ready to deploy. Rotate flags from their storage position to the display position for use, reverse to store sign. Flags are 18" x 18" blaze orange vinyl coated nylon on 1" wide fiberglass staffs.

Flip-up System

Plastic Buckle Pockets

Bungee Flag-up

- Display 2 High-Visibility flags in seconds.
- Both flags are held in a positive display position at all times for a safer work zone and enhanced warning.
- Tension band holds flags against wind in a positive display position.
- Uses field serviceable parts.
- 30" flat staffs hold 18" flags.
- Flags roll up inside sign for self-contained compact storage.

Bungee Flag-up

Stay-in Sewn Corner Pockets

CORNER OPTIONS:

Plastic Buckle Pockets

Tough polycarbonate material. These pockets are attached to the sign via an elastic band which keeps constant tension on the sign in hot and cold weather. This pocket system deploys quickly and offers a very small rolled up diameter for easier storage.

Stay-in Sewn Corner Pockets

Triple strength 18 oz. vinyl pockets are very durable and deploys quickly and offers a very small rolled up diameter for easier storage.

EMERGENCY TRAFFIC CONTROL ROLL-UP

- Improve motorist recognition with fluorescent pink coral color
- High visibility in all light conditions – especially low light
- Superior nighttime brightness
- Rapid deployment and take down

Emergency traffic situations on the roadway present a complex and dangerous environment to both the motorist and emergency personnel. Fluorescent vinyl sheeting provides motorists with the visual cues needed for safety navigation through the emergency scene.

The Fold & Roll™ sign and stand combination brings ultra compact system storage and lightning fast deployment to emergency traffic control. Designed so that a full 48" sign and stand combo fits easily into the trunk of a squad car or a small storage compartment on a truck, the Fold & Roll™ sets up far faster than any other sign system in the industry allowing responders to concentrate fully on the task at hand.
